Section 1: Subject Knowledge

Middle School English 2015

The heart attack was a setback. Anita had to rest and take medicines. Her mother helped out with the kids and with dinner. Her hours at the bakery were reduced.

Q1) Including the sentence, “The bakery, Splendiferous, sold delicious pastry.” would:

- A. Clarify the passage as Anita works at the bakery.
- B. Distract as details of the bakery are unnecessary here.
- C. Neither add nor detract from the passage, as it is the same.
- D. Make the passage more personal.

Q6) Mr. Prakash teaches 50 students and knows that about ten of them need significant additional support that he is not able to provide. The Principal of the school asks him to identify five students for a respected remediation program in Maths offered by student volunteers from a nearby college. The volunteers can cover at most two to three topics with these students.

To identify the five students, Mr. Prakash conducts a 30-question Maths test, on ten different topics, and analyses the data to take a decision. Which of the following analyses will be most relevant for this purpose?

- A. Total scores for all topics taught
- B. Score of all students in topics with the highest class average
- C. Standard deviation of scores
- D. Mean, median and mode of the class

Marks: 2

Q7) Ms. Divya has been a teacher in a high-end school for 10 years and has always tried to involve parents of her students in school activities. She has recently relocated to a small town and has joined as a teacher in a low cost private school serving mostly poor children. Should she continue to try and involve parents in school activities, which is currently not being done in this school?

- A. Yes. The school has limited resources and she should continue to get parents involved and contribute.
- B. Yes. Parents are an integral part of a child's education and should be involved in school activities.
- C. Yes. She would be able to establish herself as a pioneer in her new school with this initiative.
- D. Yes. The parents here are likely illiterate and poor, and this is a good opportunity for them also to learn.

Marks: 1

Q8) You have given three different tasks to three groups in your classroom.

Group 1: Compare the given figures and find out which one occupies more area. Group 2: Calculate the perimeter of the given shapes using a ruler. Group 3: Find out how many steps you can take along the sides of the classroom walls by walking heel to toe. On what basis have these groups most likely been created?

- A. Based on student learning styles.
- B. Based on student learning levels.
- C. Based on student interest in Maths.
- D. Based on students' cognitive ability.

Marks: 2

Section 3: Logical Ability and Communication
